

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending numerous years working with his brother to assemble their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

During their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could promptly and safely elevate individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a joint venture with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current models.

JLG lift trucks have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the company proudly continues to expand itself into a range of marketplaces worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer environment.
