

## Barrel Clamps

Barrel Clamps - A Barrel Clamp is actually a hydraulic or mechanical attachment intended for a lift truck. It can be used so as to compress the object you wish to transport with the forklift and is often utilized for handling barrels, kegs and paper rolls. A few types of barrel clamp accessories also have a rotate function. For example, the rotate function allows a forklift operator to be able to put in a vertically stored paper into the horizontal intake of a printing press.
