

Concrete Hoppers

Concrete Hopper - The self-dumping hopper attachment could automatically start to both unload and release whenever the bumper release touches the side of a dumpster. After unloading is done, the hopper can return to original locked and upright position. This particular piece of machinery is likewise accessible along with a cable which enables operation from the seat of the forklift in order to have the option of manually unloading the hopper. There is a locking chain provided to secure the hopper to the fork truck. This product is constructed with reliable and consistent robotic welds for maximum strength. The forklift dumping hopper also has a blue powder coat finish in order to maintain durability.
